FINAL PROGRAM (5.10.16)

Sociological Perspectives on Education

Conference organized by the
Sociology of Education Research Network
of the Swiss Sociological Association (SSA)

4th & 5th November 2016, Campus PH Zürich

In the past the development of educational sociology within Switzerland's various language regions has differed. In the French-speaking part of Switzerland educational sociology has drawn upon the French tradition of the sociology of school, which is enriched by both political-scientific and post-Bourdieu perspectives. In the German-speaking part, research in educational sociology has often been based on sociological systems theory, rational choice approaches, discourse analysis or organizational sociology. Both language regions have in common that research in educational sociology not only covers general education but also focuses on vocational education, higher education, academic careers etc.

The influence of the different schools of thought in the French- and German- speaking social sciences have produced a multitude of theoretical and methodological approaches within the sub-discipline of educational sociology. Together with the increasing number of articles in the Swiss Journal of Sociology covering educational topics, this multitude highlights the potential of the still small but emerging field of Swiss educational sociology. This has prompted the Swiss Sociology of Education Research Network (created in early 2012) to organize a first conference. It took place in 2014 in Fribourg with the aim of providing an overview of current research in educational sociology in Switzerland. At this conference a fruitful exchange between the language regions and various theoretical traditions started successfully. This second conference aims at following up and carrying on this exchange.

This event is sponsored by the Swiss Sociological Association and the Swiss Academy of Humanities and Social Sciences.

Final Program

Friday, 4th of November 2016

12.00 – 13.00, Registration Room LAA K020 (Main Building, 7th floor)

13.00 – 13.30, LAA K020: Opening and Welcome

- Peter Treppe, Research Director of the PHZH
